District Dossier Template

Description

This resource is provided as an example of the Establishing Foundations Key Action of how to "Structure school partnerships to ensure members of the school community who best know and understand the strengths and needs of the students you are aiming to serve are able to fully participate." This District Dossier Template provides a roadmap to groups interested in partnering with districts, and it guides the user on which information is critical to gather to determine whether or not a certain district (or LEA, more generally) is the right fit for a partnership. This dossier template enables the creation of a comprehensive district profile, from socio-economic and demographic information to information about academic programming. Please view the full dossier below.

This resource is part of the EF+Math Inclusive R&D Toolkit. It was last updated on 08.2021. To access the complete toolkit and other resources, visit www.efmathprogram.org.
